Derating Forklift Capacity

The capacity rating plate on the forklift truck must be corrected when attachments are installed. This is called derating the lifting capacity. This is a rules and regulations mandate. It is the forklift owner's responsibility to contact their forklift truck manufacturer / distributor with this information to obtain a new capacity rating on the forklift's nameplate. A reference guide with forklift scale derating specifications can be found on our website <http://www.averyweigh-tronix.com/products/industrial-weighing-scales/forklift-truck-scales/>
