WEIGHBRIDGE DATA SYSTEM

Vehicle weighbridge data information system

Weighman

Avery Weigh-Tronix

At Avery Weigh-Tronix we understand the needs of weighbridge users like no other organisation – we can provide complete weighbridge solutions, including hardware, software and unrivalled nationwide service coverage.

Management Control

Your weighbridge has the potential to provide a wealth of information that can help you to control wastage, monitor costs and improve efficiencies.

Rapid Throughput

Weighman enables you to maximise throughput of vehicles at your site and minimise queuing for weighbridges. Capture the essential data you need for each transaction, making the process as fast and efficient as possible for the operator.

Transactions need minimal data entry so errors can be dramatically reduced or eliminated. Short cut keys, stored vehicle tares and features such as instant recall of customer and haulier data - all help to make life easier for staff and increase productivity.

Operator prompts guide the user smoothly and quickly through transaction routines.

Information at your fingertips

Your Weighman software delivers valuable reports such as tonnage by product, sales etc. These reports are available in the format of your choice, enabling you to analyse data using popular desktop tools such as Microsoft Excel and Access. Customised reports can also be requested.

Improved cash flow

Reduce billing cycles and improve cash flow by quickly translating transactions into invoices that can be printed or integrated with your accounts systems. All invoice transactions are recorded and readily accessible in case of queries.

This information can also be used for effective price and tax scheduling to ensure there are no last minute panics at important financial periods. The flexible system can even take account of site based pricing to suit multi-site operations.

Peace of Mind

Weighman provides detailed audit trails for added security and data integrity. It can even monitor the activities of individual users to minimise fraud. It is a scalable solution that uses Microsoft database technology for your peace of mind.

Improve site security

The ability to use software, RFID (radio frequency identification) and video footage provides users with an additional level of security by providing important data about who and what is entering and leaving the site.

The ZM305 GTN indicator is designed for use with Weighbridge systems.

Unmanned operation

Weighman 8 when paired with our ZM510 indicator can fully marshal your weighbridge and streamline your weighbridge operations while protecting your business revenues with its built-in fraud protection.

1. **Barrier Gate** – Restricts unauthorised access to the site and controls vehicle movement.
Vehicle Position Photocells – To ensure the vehicle is correctly positioned on the weighbridge.
2. **Vehicle Detection Loop** – Detects vehicles approaching the scale and ensures proper vehicle positioning before capturing weights.
3. **Weighbridge** – Can be installed in a pit or above ground on a slab or piers.
4. **Scale Guide Rails** – Protects against accidental drive-offs and ensures proper vehicle positioning.
5. **Video surveillance** – Deters vandalism and allows remote viewing of the installation.
Proximity Readers – Long or short range readers to identify the vehicle or driver.
6. **Traffic Light** – Shows availability of the scale and directs vehicle movement.
7. **XR Remote Display** – Clear, comfortable viewing of scale information at considerable distances.

MINIMUM SYSTEM REQUIREMENTS

- › Operating system:
Windows 10 or later
- › Hardware: i5 Processor
- › 4 GB RAM
- › 500 GB HDD
- › CD ROM
- › SVGA monitor (800 x 600 pixels)
- › Microsoft® SQL Server/Express 2012 or later

Weighman is a powerful network application that allows you to synchronise data remotely.

Delivering Service Excellence Globally

- › At Avery Weigh-Tronix, we strive to deliver cost effective service options that fit your specific requirements.
- › Our solutions help you to maximise continuous operation, keeping your equipment running smoothly and minimising costly disruption to your business.
- › We have more than 250 years of experience, backed by worldwide investment in research and development.
- › Advanced reporting systems to give you visibility and control.
- › ISO9001, ISO 14001:2015 and ilac - MRA laboratory ISO 17025 accredited.
- › Global distributor support network approved to verify scales as legal for trade.
